** News From the K5N Team **

Hello to everyone....Danny-N5OMG lives in New Orleans very close to EL58. Recently, he enlisted the aid of a boat captain that has over 50 years experience in those waters. Danny asked the captain to go down to Burwood Island in EL58 and check it out for us. Danny wanted an "eyes on" report so that we can decide what to do. The captain came back and gave us the following information:
1)Most of the island where you need to be is under water,
2)The rest of the island is covered with mud(deposited by the flooding river), and
3)The safe anchor area that we had for the boats has been washed away
The captain estimated that it would be at least 4 weeks until the flood has gone down enough to reveal our operating spot and that even if the operating spot was out of the water, it will still be covered in mud. It is going to take a year or more of rains to wash the mud off the island and reveal our operating area as a sandy beach.
These facts are not very nice. The team had a conference call and we "cussed and discussed" the situation. Most reluctantly, we all agreed that we will have to cancel EL58 for 2011. All of us wanted to go to EL58-none of use wanted to cancel. However, we just cannot cope with "under water" or "under mud" and no place to safely park the boats. We are already planning / scheming for 2012. We are looking at another exotic location....I am pulling for Tahiti.... others have reminded me that the South Pacific has no grids in FFMA.
